INSTRUMENTS, CHEMICALS AND CONSUMABLES FOR CELL DIAGNOSTICS

PRODUCT GROUP WAX

HISTOWAX®

A superior embedding material - a mixture of pure paraffin and other waxes designed to facilitate the sectioning of tough or soft tissue. Compression of tissue due to cutting is reduced to a minimum. Should wrinkles be present, they are easily removed and damaged tissue due to cutting is reduced to a minimum.

The pellet form provides easier handling and faster melting characteristics. Histowax Special® has a melting point of 52°-54°C. Histowax® has a melting point of 56°-58°C.

Histowax® is free from toxic contaminants - it is triple filtered and thus very pure. Our wax has a continuous high quality through our automated manufacturing process and is ready for use after melting.

HISTOWAX® 56°-58°C
12 X 1KG
ART NO: 00403

HISTOWAX® 56°-58°C
BOX 15 KG
ART NO: 00402-1

HISTOWAX® SPECIAL 52°-54°C
BOX 15 KG
ART NO: 00405
12 X 1 KG
ART NO: 00407

SPECIFICATIONS

Content: mixture of purified paraffin's and microcrystallizing waxes.

Melting point: 52°-54°C, 56°-58°C.

Packing: 1-kg polyethylene bags packed 12 in a box.
15 kg in boxes.

Art code: 00402-1 Histowax® 56°-58°C (15 kg box)
00403 Histowax® 56°-58°C (12 x 1 kg)
00405 Histowax Special 52°-54° C (15 kg box)
00407 Histowax Special 52°-54° C (12 x 1 kg)
