Make Swaddle Bathing Easy

TurtleTub™

Swaddle bathing is the least stressful form of bathing for the baby and the caregiver.[6]

Swaddle Bathing...

- Supports family-centered care[3,6]
- Mimics compact environment of womb[3]
- Decreases physiologic and motor stress[1,3,4]
- Conserves energy[1,3,4]
- Improves state control[6]
- Enhances ability to feed after bath[3,6]
- Decreases temperature loss[1,3]
- Causes less crying[6]
- Facilitates social interaction[6]
- Should be routine in your hospital[1,3,6]

"My baby had a swaddle bath, I expected him to cry while having a bath but due to the benefits of swaddle bathing he was relaxed, calm and I definitely think that swaddle bathing is very beneficial." [3]

TT1108	(3)	**TurtleTub Mesh Storage Bags**	10

Notes:
(1) Items TT1100 & TT1101 comprise a single-patient use system that enable the hospital to perform multiple baths on the same patient. With this system the TurtleTub becomes the patient's bathtub and it can be gifted to the family at discharge. This is the most baby friendly and the most family-centered care system. Patient satisfaction scores are likely to benefit from using this system. Items TT1103 & TT1108 complement this system.
(2) Items TT1106 and TT1107 comprise an alternative system that enable the TurtleTub to be reused on multiple patients, using a disposable liner.
