

**Oral sample collection**
**EASY • PAINLESS • PROVEN**

## Collect superior samples for your genetic analysis

ORACollect®-RNA is an all-in-one system for the collection, stabilization and transportation of RNA from human saliva for *in vitro* diagnostic use. The user-friendly kit design makes it ideal for self- or assisted collection from donors of any age, in a clinic or at home. ORACollect-RNA stabilizes RNA at room temperature for months and is compatible with downstream expression analysis applications such as RT-qPCR, microarray and RNAseq.

### Applicable for:

- Use with diagnostic assays (e.g., SARS-CoV-2)
- Human mRNA and miRNA expression profiling to identify signatures of disease
- Researching non-human forms of RNA found in saliva (e.g., viral & bacterial RNA)

### Specifications:

#### Pre-collection

- Shelf life: 12 months

#### Post-collection

- Sample storage conditions: room temperature
- Sample stability: 60 days<sup>1</sup>

For full product specifications, refer to PD-BR-00240

*Superior samples • Proven performance*

<sup>1</sup>3 days for SARS-CoV-2 viral RNA when used for diagnostic purposes.
