years of leading edge manufacturing

# The Essential Cataract Set

Cost Effective  
& Eco-Friendly

The decision to choose our reusable instruments over single-use alternatives is a simple one. Not only are you investing in world-renowned high quality titanium alloy products, but also in instruments that have less impact on the environment and are more cost-beneficial in the long term.

When you invest in a Duckworth & Kent instrument you are purchasing a product that will serve you impeccably for innumerable years and countless procedures.

This range of instruments comprises three sections:

## A Sub-Tenon's Selection

A recommended set of instruments used for administering local anaesthetic into the sub-Tenon's space prior to surgery.

## B Essential Cataract Set

A series of 5 sub-sections offering a choice of essential instruments required for cataract surgery: **B1**: specula; **B2**: forceps; **B3**: capsulorhexis forceps; **B4**: manipulators; **B5**: irrigation & aspiration.

## C Occasional Range

An extremely useful collection of instruments that may be required on an occasional basis. This encompasses situations such as blepharospasm or small inter-palpebral fissures; suturing wounds; weak zonules or capsule dehiscence; challenging nucleus cracking; explanting IOL implants; iris and IOL implant manipulation.
