Uitleg over de slagbomen/parking :

- Rij langzaam naar de slagboom en hou voldoende afstand van jouw voorganger. Zodra jouw auto dicht genoeg bij de camera is, zal de camera jouw nummerplaat herkennen en zal de slagboom openen.

- Indien je voor de slagboom staat en er is een probleem met openen, kan je gebruik maken van de parlofoon. De Bewaking zal je dan voorthelpen.

- De procedure om de campus te verlaten, is dezelfde als bovenstaande procedure ter plaatse. Benader de slagbomen en via nummerplaatherkenning zullen ze geopend worden

Instruction to the parking:

There is a controlled barrier before the parking:

- Drive slowly towards the barrier. The camera below will read your licence plate number and open the barrier.
- In case of problems contact the service monitoring (using the button on the keypad) at the barrier.
- Leaving the campus will be the same procedure
